If you want to pass the exam quickly, 156-605 prep guide is your best choice, With this version of our 156-605 exam questions, you will be able to pass the exam easily.

Our 156-605 exam study torrent will show you the best way to make you achieve the most immediate goal of you, Almost all the candidates who are ready for the qualifying examination know our 156-605 exam questions.

Our 156-605 practice questions are the best study materials for the exam in this field, we will spare no effort to help you pass the exam as well as getting the related certification.

NEW QUESTION: 1
Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2. All servers run Windows Server 2012 R2. Server1 and Server2 have the Failover Clustering feature installed. The servers are configured as nodes in a failover cluster named Cluster1. Cluster1 has access to four physical disks. The disks are configured as shown in the following table.

You need to ensure that all of the disks can be added to a Cluster Shared Volume (CSV).
Which two actions should you perform? (Each correct answer presents part of the solution. (Choose two.)
A. Disable BitLocker on Disk1
B. Enable BitLocker on Disk4
C. Format Disk3 to use NTFS
D. Format Disk2 to use NTFS
Answer: A,D
Explanation:
Explanation/Reference:
Explanation:
In Windows Server 2012 R2, a disk or storage space for a CSV volume must be a basic disk that is partitioned with NTFS or ReFS, but you cannot use a disk for a CSV that is formatted with FAT or FAT32.
CSV supports bitlocker, but you would have to enable it on all nodes in the cluster. Therefore, we need to disable bitlocker on Disk1.
Use Cluster Shared Volumes in a Failover Cluster

NEW QUESTION: 3
What does packet latency thresholding measure?
A. the total elapsed time it takes to process a packet
B. the time span between a triggered event and when the packet is dropped
C. the amount of time it takes to process an event
D. the amount of time it takes for a rule to process
Answer: A

NEW QUESTION: 4

Identify two characteristics of model-view-controller architecture.
A. The separation of user interface components from the underlying application and business logic makes
the code more flexible and easier to maintain.
B. The view reads data from the controller to render the appropriate user interface.
C. When a user interacts with the view, the controller handles page navigation.
D. The view layer represents the data values bound to the current page.
Answer: A,C
Explanation:
Explanation/Reference:
A: Key Benefits of the model-view-controller architecture are:
Speeds up application development
Protects from technology shifts
Increase reusability across applications
Create open and standard based applications
C: The controller layer processes user input and determines page navigation.
Incorrect Answers:
B: The model layer represents the data or state of the component and is its underlying logical
representation.
D: The business service layer, not the view layer, handles data access.
