So with it you can easily pass the exam.

NEW QUESTION: 1
Ein Techniker möchte den Staub in einem Desktop-Computer
entfernen. Welche der folgenden Methoden sollte der Techniker
verwenden, um die Staubexposition zu minimieren und
gleichzeitig die internen Hardwarekomponenten zu schützen?
(Wählen Sie ZWEI).
A. ESD-Matte
B. Antistatischer Beutel
C. Gummihandschuhe
D. Maske
E. Schutzbrille
F. ESD-Band
Answer: D,E

NEW QUESTION: 2
Case Study 5
Requirements
Receipt processing
Concurrent processing of a receipt must be prevented.
Logging
Azure Application Insights is used for telemetry and logging in both the processor and the web application. The processor also has TraceWriter logging enabled. Application Insights must always contain all log messages.
Disaster recovery
Regional outage must not impact application availability. All DR operations must not be dependent on application running and must ensure that data in the DR region is up to date.
Security
* Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins.
* All certificates and secrets used to secure data must be stored in Azure Key Vault.
* You must adhere to the principle of least privilege and provide privileges which are essential to perform the intended function.
* All access to Azure Storage and Azure SQL database must use the application's Managed Service Identity (MSI)
* Receipt data must always be encrypted at rest.
* All data must be protected in transit
* User's expense account number must be visible only to logged in users. All other views of the expense account number should include only the last segment, with the remaining parts obscured.
* In the case of a security breach access to all summary reports must be revoked without impacting other parts of the system.
Issues
Upload format issue
Employees occasionally report an issue with uploading a receipt using the web application. They report that when they upload a receipt using the Azure File Share, the receipt does not appear in their profile. When this occurs, they delete the file in the file share and use the web application, which returns a 500 Internal Server error page.
Capacity issue
During busy periods, employees report long delays between the time they upload the receipt and when it appears in the web application.
Log capacity issue
Developers report that the number of log message in the trace output for the processor is too high, resulting in lost log messages.
Application code
Processing.cs

Database.cs

ReceiptUploader.cs

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this question, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to ensure that the SecurityPin security requirements are met.
Solution: Using the Azure Portal, add Data Masking to the SecurityPin column, and exclude the dbo user. Add a SQL security policy with a filter predicate based on the user identity.
Does the solution meet the goal?
A. Yes
B. No
Answer: B
Explanation:
Instead of DataMasing, enable Always Encrypted for the SecurityPin column.
Scenario: Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins.

NEW QUESTION: 3

A. Option A
B. Option B
C. Option C
D. Option E
E. Option D
Answer: A

NEW QUESTION: 4
How does understanding the customer's business model holistically address the customer's business challenge?
A. With the comprehensive solution addressing their whole infrastructure, it is easier for customers to see value and progress, see gaps and what is next, and manage their IT

investments.
B. Segmentedsolutions designed for their specific outcomes make it easier for them to be more relevant to their company's business challenges.
C. Customers define how they want to measure success, and we work with them to turn this into metrics and a plan to achieve results.
D. As your conversations become more focused on their business challenges and value, customers will see you as a problem solver and not just a sales person.
Answer: A
