NEW QUESTION: 1

The environment that must be protected includes all personnel, equipment, data, communication devices, power supply and wiring. The necessary level of protection depends on the value of the data, the computer systems, and the company assets within the facility. The value of these items can be determined by what type of analysis?

- A. Critical-channel analysis
- B. Critical-conduit analysis
- C. Covert channel analysis
- D. Critical-path analysis

Answer: D

Explanation:

Explanation/Reference:

Explanation:

The value of items to be protected can be determined by a critical-path analysis. The critical-path analysis lists all pieces of an environment and how they interact.

Incorrect Answers:

A: Critical-channel analysis is not the correct term for the analysis described in the question. Therefore, this answer is incorrect.

B: A covert channel is a way for an entity to receive information in an unauthorized manner. Covert channel analysis is used to determine where covert channels exist. This is not the analysis described in the question. Therefore, this answer is incorrect.

D: Critical-conduit analysis is not the correct term for the analysis described in the question. Therefore, this answer is incorrect.
