You are an Office 365 administrator. You need to share a document with a colleague at another organization.

The solution must meet the following requirements:

- * Share only required information.
- * Prevent anonymous access.
- * Allow multiple editors to work on the document simultaneously.

What should you do?

- A. Share the document by inviting the external user to sign in to your site by using a Microsoft account or a work or school account.
- B. Send the external user a guest link to the document in a Microsoft OneDrive for Business instance.
- C. Send the external user a guest link to the document in a Microsoft SharePoint Online document library.
- D. Share an entire site by inviting the external user to sign in to your site by using a Microsoft account or a work or

school account.

Answer: A

Explanation:

Explanation

Sharing With Authenticated External Users

Content can be shared with authenticated external users, meaning guest users are sent an invitation by email and prompted to sign in using an account from a trusted provider in order to access the content in question.

Once the invitation is accepted, they are added to your organization's directory as an external user, but will only have access to the specific elements you shared with them. If you've shared an entire site, they'll have access to everything in it, so make sure it doesn't contain sensitive content.
