NEW QUESTION: 1

A. Option D
B. Option A
C. Option B
D. Option C
Answer: B,C

NEW QUESTION: 2

A. Option D
B. Option B
C. Option C
D. Option A
Answer: C
Explanation:
Explanation
The AWS Documentation mentions the below
Real-time metrics and reporting
You can use data collected into Kinesis Streams for simple data analysis and reporting in real time. For example, your data-processing application can work on metrics and reporting for system and application logs as the data is streaming in, rather than wait to receive batches of data.
Real-time data analytics

This combines the power of parallel processing with the value of real-time data. For example, process website clickstreams in real time, and then analyze site usability engagement using multiple different Kinesis Streams applications running in parallel.
Amazon Glacier is meant for Archival purposes and should not be used for storing the logs for real time processing.
For more information on Amazon Kinesis, please refer to the below link:
*
http://docs.aws.amazon.com/streams/latest/dev/introduction.html

NEW QUESTION: 3
For a customer of a company there is a relation between the region of the customer and the sales manager for this region. How can this request be implemented in JDEdwards?
A. Use category codes in the address book and set up category code data relationships.
B. Use category codes in the Accounts receivable Master F03012.
C. Use category codes in the Accounts Receivable Ledger F03B11.
D. Use the address book category codes.
Answer: D

NEW QUESTION: 4
Note: In this section you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. More than one solution might solve the problem. It is also possible that none of the solutions solve the problem.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.
You need to meet the vendor notification requirement.
Solution: Update the Delivery API to send emails by using a Microsoft Office 365 SMTP server.
Does the solution meet the goal?
A. Yes
B. No
Answer: B
Explanation:
Explanation/Reference:
Explanation:
Use a custom outbound Azure API Management policy.
Scenario:

If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor. (API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.) References: https://docs.microsoft.com/en-us/azure/api-management/api-management-howto-policies
