You have a server named Server1 that runs Windows Server 2012 R2.

You need to configure Server1 to create an entry in an event

log when the processor usage exceeds 60 percent.

Which type of data collector should you create?

- A. A performance counter data collector
- B. A performance counter alert
- C. An event trace data collector
- D. A configuration data collector

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Performance alerts notify you when a specified performance counter exceeds your configured threshold by logging an event to the event log. But rather than notifying you immediately when the counter exceeds the threshold, you can configure a time period over which the counter needs to exceed the threshold, to avoid unnecessary alerts.
