**NEW QUESTION: 2**

Which three applications originate a buy request that is received by supply chain orchestration? (Choose three.)

- A. Purchasing
- B. Self Service Procurement
- C. Order Management
- D. Accounts Payable
- E. Inventory
- F. Planning

**Answer: C,E,F**

**NEW QUESTION: 3**

EC2 instances in a VPC are unable to connect to an Amazon S3 bucket. The administrator notices that the instances are unable to resolve the bucket name to an IP address. Which configuration change would resolve this issue?

- A. S3 bucket VPC endpoint is not enabled. Enable the endpoint.
- B. NAT gateway is not configured. Configure a NAT gateway.
- C. SSL certificate is not configured. Configure a certificate.
- D. Instance profile is not configured. Configure an instance profile.

**Answer: A**

Explanation:

Explanation

The AWS Documentation mentions the following

A VPC endpoint enables you to privately connect your VPC to

supported AWS services and VPC endpoint services powered by PrivateLink without requiring an internet gateway, NAT device, VPN connection, or AWS Direct Connect connection. Instances in your VPC do not require public IP addresses to communicate with resources in the service. Traffic between your VPC and the other service does not leave the Amazon network.

Option A is invalid because using a proxy server is not sufficient enough Option B and D are invalid because you need secure communication which should not traverse the internet For more information on VPC endpoints please see the below link <https://docs.aws.amazon.com/AmazonVPC/latest/UserGuide/vpc-endpoints.html> The correct answer is: Access the S3 bucket through a VPC endpoint for S3 Submit your Feedback/Queries to our Experts
