- D. less than three APICs

Answer: A

NEW QUESTION: 4

A user creates an Auto Scaling group from the Amazon AWS Console and assigned a tag with a key of "environment" and a value of "Prod". Can the user assign tags to instances launched in the Auto Scaling group, to organize and manage them?

- A. Yes, this is possible only if the tags are configured at the launch configuration with a maximum length of 300 characters.
- B. Yes, this is possible only if the tags are in the same AZ and the tag names are uppercase.

C. Yes

D. No

Answer: C

Explanation:

Explanation

You can organize and manage your Auto Scaling groups by assigning your own metadata to each group in the form of tags. You specify a key and a value for each tag. A key can be a general category, such as "project", "owner", or "environment", with specific associated values. By default, the instance will have a tag with the key as "aws:autoscaling:groupName" and the value as the name of the group.
