NEW QUESTION: 3

Which three are use cases for data maps? (Choose three.)

- A. To integrate data between the business frameworks
- B. To allow users to drill back to the data in a different cube
- C. To push data from a planning cube to a reporting cube
- D. To create a replicated partition between cubes
- E. To integrate data between custom plan types and the business frameworks

Answer: B,C,E

Explanation:

Explanation/Reference:

Data maps are maps between a source application and a reporting application.

You can map dimensions between a source application database and a reporting database to enable:

Reporting on source application data in a reporting application

Aggregating and querying on Smart Lists, which are converted to regular dimensions in the reporting

application

Linking application data to multiple reporting applications for various consolidations
