NEW QUESTION: 2

You have a hybrid infrastructure that contains an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. The tenant contains the users shown in the following table.

You plan to share a cloud resource to the All Users group. You need to ensure that User1, User2, User3, and User4 can connect successfully to the cloud resource. What should you do first?

- A.** Create a user account of the member type for User3.
- B.** Modify the Directory-wide Groups settings.
- C.** Modify the External collaboration settings.
- D.** Create a user account of the member type for User4.

Answer: B

Explanation:

Explanation

Ensure that "Enable an 'All Users' group in the directory" policy is set to "Yes" in your Azure Active Directory (AD) settings in order to enable the "All Users" group for centralized access administration. This group represents the entire collection of the Active Directory users, including guests and external users, that you can use to make the access permissions easier to manage within your directory.
