**NEW QUESTION: 1**
The following distributed environment has been configured:

The administrator wants to limit writes to the audit database connection from the Content Manager server only.
What needs to be configured?
**A.** On the Content Manager server configure the audit database, on the application tier servers create a Remote log server configuration to the Content Manager log server.
**B.** In advanced settings, add the parameter RSVP.logging.databasecontrol with the value &lt;Content Manager Server&gt;:&lt;Port&gt;.
**C.** The Content Store configuration has to be set up on the application tiers servers.
**D.** An advanced routing has to be configured in Cognos Administration audit requests from application tiers routed to Content Manager server.
**Answer: D**
Explanation:
Explanation/Reference:
Explanation:
If a request should be subject to Advanced Routing, then the client which send the request is responsible for calling CM to evaluate Routing Rules and put the Server Group Information into the request passed to a Dispatcher.
