Answer: B,D

NEW QUESTION: 2

- A. Option A
- B. Option C
- C. Option D
- D. Option B

Answer: D

Explanation:

Page 131 of vsphere-update-manager-50-install-administration-guide.pdf
NOTE

Update Manager 5.0 does not support virtual machine patch baselines.

If a host is connected to vCenter Server by using an IPv6 address, you cannot scan and remediate virtual machines and virtual appliances that run on the host. Remediation of VMware vCenter Server Appliance is not supported. For more information about upgrading the virtual appliance, see the vCenter Server upgrade documentation.

Page 56 of vsphere-esxi-vcenter-server-50-upgrade-guide.pdf
Upgrade the VMware vCenter Server Appliance
Because the VMware vCenter Server Appliance was first released with vSphere 5.0, upgrading the appliance is not required until a future release. This information helps you plan for future upgrades.

Procedure

1. Deploy the new version of the vCenter Server Appliance. The new appliance has a default network configuration, and the vCenter Server service is unconfigured and disabled.
2. Connect to both the old and new appliances in separate browser windows.
3. In the Upgrade tab of the new appliance, select destination for the appliance role, and click Set role.
4. In the Upgrade tab of the old appliance, select source for

the appliance role, and click Set role.

5. In each appliance, click Establish Trust. The local appliance key appears.

6. In the new appliance, copy the local appliance key.

7. Paste the local appliance key into the Remote appliance key field of the old appliance.

8. Click Import remote key in the old appliance.

9. In the old appliance, copy the local appliance key.

10. Paste the local appliance key into the Remote appliance key field of the new appliance.

11. Click Import remote key in the new appliance.

12. In the new appliance, click Import, and click Start import. The new appliance shuts down the old appliance and assumes the network identity of the old

appliance. This process can take several minutes. When the import is complete, the new vCenter Server Appliance starts.

NEW QUESTION: 3

John bought grocery products for 10 dollars using 55 coins. If John used quarters and dimes, what is the difference between the numbers of dimes to the number of quarters that he used?

A. 25.

B. 30.

C. 5.

D. 10.

E. 15.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Define X as the number of dimes that John used. Just a reminder, dimes are 10 cents coins.

The number of quarters that he used is $(55 - X)$. We can write the following equation:

$10X + 25(55 - X) = 1000$. Notice that 1000 is the money he spent in cents.

Therefore $(-15X = -375) \hat{c}€ X = 25$.

The number of dimes is 25 and the number of quarters is $(55 - 25 = 30)$.

The difference between the amounts is 5 coins.

NEW QUESTION: 4

A. Option A

B. Option D

C. Option B

D. Option C

Answer: B
