NEW QUESTION: 1

HOTSPOT

You are the Exchange Online administrator for an organization. The organization migrates all users to Exchange Online. An employee works for a partner organization named Contoso, Ltd. The employee uses the email alias [\[email#160;protected\]](#) Users report that over the past week, they have not received email messages from [\[email#160;protected\]](#) You need to trace email messages that originate from [\[email#160;protected\]](#) to users inside your organization. In the message trace window, which two settings should you configure? To answer, select the appropriate objects in the answer area.

Answer:

Explanation:

Explanation:

As we want to trace the emails originated from [\[email#160;protected\]](#) we must specify him as the sender. We also know that email messages from this user has not been received for the last 7 days. We should therefore change the start date and put it back 7 days.
