NEW QUESTION: 1

- A. SAML credential tokens
- B. Windows Authentication
- C. MS-CHAP
- D. Azure managed access keys

Answer: A

Explanation:

A Microsoft cloud service administrator who wants to provide

their Azure Active Directory (AD) users with sign-on validation can use a SAML 2.0 compliant SP-Lite profile based Identity Provider as their preferred Security Token Service (STS) / identity provider. This is useful where the solution implementer already has a user directory and password store on-premises that can be accessed using SAML 2.0. This existing user directory can be used for sign-on to Office 365 and other Azure AD-secured resources.

NEW QUESTION: 4

Assume you had a phase gate meeting with your Governance Board for your project to develop the next generation radar system as part of the nation's airspace modernization program. At this meeting, the Board approved your project management plan.

However, as you begin to execute your plan, an organizational process asset to consider is_____

- A. Stakeholder risk tolerances
- B. The organization's culture
- C. Process measurement data base
- D. Hiring and firing guidelines

Answer: C

Explanation:

The process measurement data base is an organizational process asset that is used to collect and make available measurement data on processes and products. The other answers are examples of enterprise environmental factors used as inputs to direct and manage the project work.
