NEW QUESTION: 2

Which of the following is the MOST important factor when designing information security architecture?

- A. Development methodologies
- B. Technical platform interfaces
- C. Stakeholder requirements
- D. Scalability of the network

Answer: C

Explanation:

Explanation

The most important factor for information security is that it advances the interests of the business, as defined by stakeholder requirements. Interoperability and scalability, as well as development methodologies, are all important but are without merit if a technologically-elegant solution is achieved that does not meet the needs of the business.

NEW QUESTION: 3

Identification establishes:

- A. Accountability
- B. None of the choices.
- C. Authentication
- D. Authorization

Answer: A

Explanation:

Identification is a means to verify who you are. Authentication is what you are authorized to perform, access, or do. User identification enables accountability. It enables you to trace activities to individual users that may be held responsible for their actions. Identification usually takes the form of Logon ID or User ID. Some of the Logon ID characteristics are: they must be unique, not shared, and usually non descriptive of job function.

NEW QUESTION: 4

- A. Option A
- B. Option D
- C. Option B
- D. Option C

Answer: C
