NEW QUESTION: 2

A technician is installing Windows 7 on a computer with a previously used hard drive. After receiving an error, the technician realizes the hard drive does not support this install. Which of the following tasks should the technician perform?

- A. Use Windows Update to download the appropriate driver.
- B. Convert the file system to NTFS.
- C. Partition the hard drive in Extended format.
- D. Enable Multiboot in the BIOS.

Answer: B

Explanation:

Section: Mix Questions

NEW QUESTION: 3

You are a licensing specialist. Your customer is Litware, Inc., a large company that has 15,000 employees.

Company Background

Litware, Inc. has 15 locations in North America and six locations in Europe and Asia. The company's two divisions are the custom software division and the hosting services division. Both divisions are experiencing significant sales growth. The custom software division creates custom software solutions that account for 75 percent of the total revenue for Litware, Inc. The hosting services division offers Microsoft Exchange and Web hosting services for customers around the world. The company frequently adds 1,000 developers and testers for up to 28 months to work on specific projects.

Network Description

The custom software division creates highly integrated solutions by using Microsoft SQL Server. The solutions must be delivered and deployed by using custom installation media.

In the past, Litware, Inc., purchased SQL Server through Full Package Product (FPP). This purchasing method no longer meets the company's solution deployment needs.

The hosting services division has one server farm that contains 500 servers. These servers run Microsoft Windows Server, Microsoft Exchange Server, Microsoft Operations Manager Server, Microsoft Systems Management Server, and Microsoft Internet Security and Acceleration Server. These applications are licensed through the company's current Select License agreement.

Current Licensing Solution

Litware, Inc. has no established purchasing procedures. Each location has a different set of desktop products.

The offices in Europe and in Asia acquire software licenses under Open License and

FPP purchases. The offices do not have Software Assurance for the servers or the desktops.

The offices in North America acquire software licenses through a Select License agreement that has Software Assurance for the servers.

Business Goals

The company's executive team suspects that the various locations do not keep track of software purchases and could not prove ownership if the company is audited. The team wants to standardize all desktops.

End of repeated scenario

You need to recommend a more convenient solution for licensing SQL Server for use in the custom solutions. What should you recommend?

- A.** Acquire the SQL Server licenses through an Open License agreement.
- B.** Acquire the SQL Server licenses through the Independent Software Vendor (ISV) Royalty Licensing program.
- C.** Acquire the SQL Server licenses through a Services Provider Licensing Agreement (SPLA).
- D.** Require each customer to obtain the SQL Server licenses through the customer's own licensing agreement.

Answer: B
