#### **NEW QUESTION: 1**

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment.

You deploy the Configuration Manager client to all client computers.

You enable Hardware Inventory and Software Inventory for all of the client computers.

You discover that one of the client computers fails to report inventory data.

You confirm that the inventory files are copied correctly to the site server. You discover, however, that the site server does not contain any data from the client computer.

You need to identify what is causing the reporting issue.

Which log file should you review?

**A.** Inventoryagent.log

- B. Mp\_hinv.log
- C. Dataldr.log
- D. Contenttransfermanager.log

**Answer: C**

Explanation:

Dataldr.log is a site server log file that records information about the processing of Management Information Format (MIF) files and hardware inventory in the Configuration Manager database.

**NEW QUESTION: 2**

Nurse Jenna is making a short-term goal for an adult male patient who is on his first week of admission following a spinal cord injury at the T3 level. What is an appropriate short-term goal that Jenna should identify?

- A. "The patient will consider changes in his lifestyle"
- B. "The patient will know his limitations"
- C. "The patient will carry out his hygiene activities"
- D. "The patient will perform ambulation independently"

**Answer: C**

Explanation:

An appropriate short-term goal that Jenna should identify is "The patient will carry out his hygiene activities." The patient has the capability and this also maintains positive identity; moreover, it is necessary for progression of long-term goals.

**NEW QUESTION: 3**

A company has 10 portable client computers that run Windows 8. The portable client computers have the network connections described in the following table.

None of the computers can discover other computers or devices, regardless of which connection they use. You need to configure the connections so that the computers can discover other computers or devices only while connected to the CorpWired or CorpWifi connections.

What should you do on the client computers?

- A. Turn on network discovery for the Private profile.
- B. Change the CorpWired connection to public. Turn on network discovery for the Public profile. For the HotSpot connection, select No, don't turn on sharing or connect to devices.
- C. For the CorpWired connection, select yes, turn on sharing and connect to devices.
- D. For the CorpWifi connection, select yes, turn on sharing and connect to devices.
- E. Turn on network discovery for the Public profile.

**Answer: B**

Explanation:

Explanation/Reference:

By design Public profile as Sharing set to no and Private profile set to Yes But it Says "None of the computers can discover other computers or devices, regardless of which connection they use" so you need to review the full config.

You can change it by doing that

Firewall Profil (for Windows 7)
